## Surface Area and Volume

## Mensuration

- It is branch of mathematics which is concerned about the measurement of length ,area and Volume of plane and Solid figure

## Perimeter

- The perimeter of plane figure is defined as the length of the boundary
- It units is same as that of length i.e. $\mathrm{m}, \mathrm{cm}, \mathrm{km}$

| 1 Meter | 10 Decimeter | 100 centimeter |
| :--- | :--- | :--- |
| 1 Decimeter | 10 centimeter | 100 millimeter |
| 1 Km | 10 Hectometer | 100 Decameter |
| 1 Decameter | 10 meter | 1000 centimeter |

## Surface Area or Area

- The area of the plane figure is the surface enclosed by its boundary
- It unit is square of length unit. i.e. $\mathrm{m}^{2}, \mathrm{~km}^{2}$

| 1 square Meter | 100 square Decimeter | 10000 square centimeter |
| :--- | :--- | :--- |
| 1 square Decimeter | 100 square centimeter | 10000 square millimeter |
| 1 Hectare | 100 square Decameter | 10000 square meter |
| 1 square myraimeter | 100 square kilometer | $10^{8}$ square meter |

## Volume

| $1 \mathrm{~cm}^{3}$ | 1 mL | $1000 \mathrm{~mm}^{3}$ |
| :--- | :--- | :--- |
| 1 Litre | 1000 ml | $1000 \mathrm{~cm}^{3}$ |
| $1 \mathrm{~m}^{3}$ | $10^{6} \mathrm{~cm}^{3}$ | 1000 L |
| $1 \mathrm{dm}^{3}$ | $1000 \mathrm{~cm}^{3}$ | 1 L |

## Surface Area

## Surface Area and Volume of Cube and Cuboid

Cube

Cuboid

| Type | Measurement |
| :--- | :--- |
| Surface Area of Cuboid of Length L, Breadth B and <br> Height H | $2(\mathrm{LB}+\mathrm{BH}+\mathrm{LH})$. |
| Lateral surface area of the cuboids | $2(\mathrm{~L}+\mathrm{B}) \mathrm{H}$ |
| Diagonal of the cuboids | $\sqrt{L^{2}+B^{2}+H^{2}}$ |
| Volume of a cuboids | $4(\mathrm{LBH}+\mathrm{B})$. |
| Length of all 12 edges of the cuboids | $6 \mathrm{~L}^{2}$ |
| Surface Area of Cube of side L | $4 \mathrm{~L}^{2}$ |
| Lateral surface area of the cube | $L \sqrt{3}$ |
| Diagonal of the cube | $\mathrm{L}^{3}$ |
| Volume of a cube |  |

## Surface Area and Volume of Right circular cylinder

This material is created by http://physicscatalyst.com/ and is for your personal and non-commercial use only.

| Radius | The radius (r) of the circular base is called the radius of the cylinder |
| :--- | :--- |
| Height | The length of the axis of the cylinder is called the height (h) of the cylinder |
| Lateral Surface | The curved surface joining the two base of a right circular cylinder is called Lateral <br> Surface. |

| Type | Measurement |
| :--- | :--- |
| Curved or lateral Surface Area of cylinder | $2 \pi r \mathrm{r}$ |
| Total surface area of cylinder | $2 \pi r(\mathrm{~h}+\mathrm{r})$ |
| Volume of Cylinder | $\pi r^{2 h}$ |

## Surface Area and Volume of Right circular cone

| Radius | The radius (r) of the circular base is called the radius of the cone |
| :--- | :--- |
| Height | The length of the line segment joining the vertex to the centre of base is called the <br> height ( $h$ ) of the cone. |
| Slant Height | The length of the segment joining the vertex to any point on the circular edge of the <br> base is called the slant height (L) of the cone. |
| Lateral surface <br> Area | The curved surface joining the base and uppermost point of a right circular cone is called Lateral <br> Surface |

| Type | Measurement |
| :--- | :--- |
| Curved or lateral Surface Area of cone | $\pi r \mathrm{~L}$ |
| Total surface area of cone | $\pi r(\mathrm{~L}+\mathrm{r})$ |
| Volume of Cone | $\frac{1}{3} \pi r^{2} h$ |

This material is created by http://physicscatalyst.com/ and is for your personal and non-commercial use only.

## Surface Area and Volume of sphere and hemisphere

## Sphere

Hemisphere

| Sphere | A sphere can also be considered as a solid obtained on rotating a circle About its diameter |
| :--- | :--- |
| Hemisphere | A plane through the centre of the sphere divides the sphere into two equal parts, each of which is <br> called a hemisphere |
| radius | The radius of the circle by which it is formed |
| Spherical Shell | The difference of two solid concentric spheres is called a spherical shell |
| Lateral Surface <br> Area for Sphere | Total surface area of the sphere |
| Lateral Surface <br> area of <br> Hemisphere | It is the curved surface area leaving the circular base |

| Type | Measurement |
| :--- | :--- |
| Surface area of Sphere | $4 \pi r^{2}$ |
| Volume of Sphere | $\frac{4}{3} \pi r^{3}$ |
| Curved Surface area of hemisphere | $2 \pi r^{2}$ |
| Total Surface area of hemisphere | $3 \pi r^{2}$ |
| Volume of hemisphere | $\frac{2}{3} \pi r^{3}$ |

This material is created by http://physicscatalyst.com/ and is for your personal and non-commercial use only.

```
Volume of the spherical shell whose outer and inner radii
and 'R' and 'r' respectively
\frac{4}{3}\pi(\mp@subsup{R}{}{3}-\mp@subsup{r}{}{3})
```

How the Surface area and Volume are determined

| Area of Circle | The circumference of a circle is $2 \pi r$. This is the <br> definition of $\pi$ (pi). Divide the circle into many <br> triangular segments. The area of the triangles is <br> $1 / 2$ times the sum of their bases, $2 \pi r$ (the <br> circumference), times their height, $r$. |
| :--- | :--- |
| Surface Area of cylinder | This can be imagined as unwrapping the surface <br> into a rectangle. |
| Surface area of cone | This can be achieved by divide the surface of the <br> cone into its triangles, or the surface of the cone <br> into many thin triangles. The area of the triangles is <br> $1 / 2$ times the sum of their bases, $p$, times their <br> height, |
