

Class 10th (Science test Unsolved)

Here we present the practice test papers for class 10 which are unsolved and you can use these for both your FA and SA accordingly as per the syllabus of your term

Paper 1

- 1) Draw the structure for the following compounds- (10)

(i) 2-methylpropane	(ii) Hexanal	(iii) Pentanone
(iv) Chlorobutane	(v) cyclopentane	
- 2) Draw the electron dot structures of-(8)

(i) Nitrogen molecule	(ii) Ethanoic acid
(ii) Hydrogen sulphide	(iv) Sulphur molecule
- 3) Explain the nature of the covalent bond using the bond formation in CH_3Cl ? (2)
- 4) What are isomers? How many isomers can you draw for hexane? Draw the three isomers? (1+1+3)
- 5) What are homologous series? Write its properties? (2+2)
- 6) Write the fourth and sixth members of the homologous series of ketone?(1+1)
- 7) What are allotropes? Write the structural comparison between three allotropes of carbon with their uses?(2+3)

Paper 2

1. Write the difference between asexual reproduction and sexual reproduction? (3 marks)
2. How does (i) amoeba and (ii) rhizopus reproduce? (2+2)
3. What is meant by vegetative reproduction? Write its advantage? (2+2)
4. Define with example- (2+2+2)

(i) Regeneration	(ii) grafting	(iii) multiple fission
------------------	---------------	------------------------
5. How does fission differ from fragmentation? (1)
6. Why multicellular complex organism cannot reproduce by regeneration? (2)
7. What is tissue culture? What type of plants are being produced increasingly by this method/ write its advantage? (2+1+2)
8. Draw diagram to show reproduction in amoeba and yeast? (5)
9. Draw a flow chart to show all types of reproduction with example? (3)
10. Why is variation beneficial to the species but not necessarily for the individual? (2)
